

ULTRA-GAIN

PRODUCT CODE: T5913FOC

FORM: Textured

MEDICATION: Monensin 20g/ton

APPLICATION:

A complete feed formulated for feedlot cattle held in confinement for improved feed efficiency.

FEEDING DIRECTIONS:

Feed continuously to provide not less than 50 mg nor more than 200 mg of Monensin per head per day. One pound of Ultra-Gain contains 10 mg monensin. Amount fed will vary depending on calf bodyweight and amount and quality of forage available. Offering small amounts of fresh feed often will increase intake. Provide fresh clean water at all times.

CAUTION: Do not allow horses or other equines access to feeds containing Monensin. Ingestion of Monensin by equines has been fatal. Monensin-medicated cattle and goat feeds are safe for use in cattle and goats only. Consumption by unapproved species may result in toxic reactions. Do not exceed the levels of Monensin recommended in the feeding directions, as reduced average daily gains may result. If feed refusals containing Monensin are fed to other groups of cattle, the concentration of Monensin in the refusals and amount of refusals fed should be taken into consideration to prevent Monensin overdosing.

WARNING: A withdrawal period has not been established for this product in pre-ruminating cattle. Do not use in calves to be processed for veal.

GUARANTEED ANALYSIS:

Crude Protein (Min.).....	13.00%
Crude Fat (Min.).....	4.00%
Crude Fiber (Max.).....	6.00%
Calcium (Ca) (Min.).....	0.50%
Calcium (Ca) (Max.).....	1.00%
Phosphorus (P) (Min.).....	0.40%
